

RAINWORKS FEEDING PROGRAM

For Power Series One-Part Nutrient (for soil gardening)

RAINWORKS
FERTILIZER CO.

STARTING SEEDLINGS

- Apply Ultra Jive once a week in the grow cycle and twice a week in the flowering cycle. Since Power Series and Ultra Jive share some vitamin & mineral properties, the amount used is less than other feed schedule application amounts.
- Use GREEN ENVY or another rooting media to reduce yellowing in clones while they develop new roots, prior to placing your cuttings (4 ml/L or 3/4 tsp/Gal)

GROWING CYCLE	Light	Power Plant	Power Flower	OPTIONAL					OPTIONAL		
				Pure Blend Grow	Bloomstar	Ultra Jive	Cal Mag	Oxy	Rain Gold	Megabud	
Seedlings & Cuttings	18 Hours	2 ml/L or 1 1/2 tsp/Gal		1 ml/L or 3/4 tsp/Gal		5 drops				1/2 ml/L or 1/8 tsp/Gal	
Week 1 200-400ppm	18 Hours					1-2 ml/L or 3/4-1 1/2 tsp/Gal				1 ml/L or 3/4 tsp/Gal	
Week 2 600-800ppm	18 Hours	3-4 ml/L or 2 3/4- 3 1/4 tsp/Gal		1 ml/L or 3/4 tsp/Gal		1-2 ml/L or 3/4-1 1/2 tsp/Gal				1 ml/L or 3/4 tsp/Gal	
Week 3 1000-1400ppm	18 Hours	5-6 ml/L or 4- 4 3/4 tsp/Gal		2 ml/L or 1 1/2 tsp/Gal		1-2 ml/L or 3/4-1 1/2 tsp/Gal	1 ml/L or 3/4 tsp/Gal	1 ml/L or 3/4 tsp/Gal		1 ml/L or 3/4 tsp/Gal	

FLOWERING CYCLE

Week 4 1000-1400ppm	12 Hours		3-4 ml/L or 2 3/4- 3 1/4 tsp/Gal	2 1/2 ml/L or 2 tsp/Gal		3-5 ml/L or 2 3/4-4 tsp/Gal	4 ml/L or 3 1/4 tsp/Gal	1 ml/L or 3/4 tsp/Gal	1 ml/L or 3/4 tsp/Gal	1-2 ml/L or 3/4-1 3/4 tsp/Gal
Week 5 1000-1400ppm	12 Hours		5-6 ml/L or 4- 4 3/4 tsp/Gal	3 ml/L or 2 3/4 tsp/Gal		3-5 ml/L or 2 3/4-4 tsp/Gal	4 ml/L or 3 1/4 tsp/Gal	1 ml/L or 3/4 tsp/Gal	1 ml/L or 3/4 tsp/Gal	
Week 6 1000-1400ppm	12 Hours		8-9 ml/L or 2 1/4-2 1/2 tbsp/Gal	3 ml/L or 2 3/4 tsp/Gal		3-5 ml/L or 2 3/4-4 tsp/Gal	4 ml/L or 3 1/4 tsp/Gal	1 ml/L or 3/4 tsp/Gal	1 ml/L or 3/4 tsp/Gal	1-2 ml/L or 3/4-1 3/4 tsp/Gal
Week 7 1000-1400ppm	12 Hours		8-9 ml/L or 2 1/4-2 1/2 tbsp/Gal	4 ml/L or 3 1/4 tsp/Gal	2-5 ml/L or 1 3/4-4 tsp/Gal	3-5 ml/L or 2 3/4-4 tsp/Gal	3ml/L or 2 3/4 tsp/Gal	1 ml/L or 3/4 tsp/Gal	1 ml/L or 3/4 tsp/Gal	OR
Week 8 1000-1400ppm	12 Hours		8-9 ml/L or 2 1/4-2 1/2 tbsp/Gal	4 ml/L or 3 1/4 tsp/Gal	2-5 ml/L or 1 3/4-4 tsp/Gal	3-5 ml/L or 2 3/4-4 tsp/Gal	3ml/L or 2 3/4 tsp/Gal	1 ml/L or 3/4 tsp/Gal	1 ml/L or 3/4 tsp/Gal	
Week 9 1000-1400ppm	12 Hours		8-9 ml/L or 2 1/4-2 1/2 tbsp/Gal		2-5 ml/L or 1 3/4-4 tsp/Gal	3-5 ml/L or 2 3/4-4 tsp/Gal	1 ml/L or 3/4 tsp/Gal	1 ml/L or 3/4 tsp/Gal	1 ml/L or 3/4 tsp/Gal	1-2 ml/L or 3/4-1 3/4 tsp/Gal
Week 10 1000-1400ppm	12 Hours		6 ml/L or 4 3/4 tsp/Gal					1 ml/L or 3/4 tsp/Gal	1 ml/L or 3/4 tsp/Gal	

- For best results it is recommended that a premium potting soil containing earthworm castings, bat guano and micros be used, for example PLANTING MIX, COCO, or make your own.
- In week 5 use 1 g/10 L or 1/3 oz/2 1/2 Gal BIG BLOSSOM to add mass to your bud's and blooms.
- Leach with CLEARING SOLUTION once every week when changing formulas.
- For best results a pH of 6.0-6.5 should be maintained.
- * During week 4 (or just before desired height is achieved) introduce MEGABUD into your feeding schedule to regulate the height of your plants and encourage multiple bud sites. Use it again in week 6 to act as a finisher, **OR** in week 9 to harden flowers.

All measurements are based on water with a ppm of 0. This feeding schedule is produced by the manufacturer and is only a guideline. Individual results may vary and are not guaranteed. Not all plants will react the same to every product. It is important that you experiment with different products and dosages to come up with a feeding schedule that meets your needs to produce plants with maximum yield.
