

RAINWORKS FEEDING PROGRAM

For DNF Two-Part Nutrient

RAINWORKS
FERTILIZER CO.

STARTING SEEDLINGS

- Use GREEN ENVY or another rooting media to reduce yellowing in clones while they develop new roots, prior to placing your cuttings (4 ml/L or 3/4 tsp/Gal)

	Light	DNF Gro A	DNF Gro B	DNF Bloom A	DNF Bloom B	Big Blossom	Green Envy	Black Rain	Rain Gold	Megabud	Bloomstar	Ultra Jive
Seedlings/Cuttings	18 Hours	1¼ ml/L or 1 tsp/Gal	1¼ ml/L or 1 tsp/Gal				3 ml/L or 2½ tsp/Gal	5 ml/L or 4 tsp/Gal	½ml/L or ⅛ tsp/Gal			5 drops
Week 1 Vegetative	18 Hours	2½ ml/L or 2 tsp/Gal	2½ ml/L or 2 tsp/Gal				5 ml/L or 4 tsp/Gal	5 ml/L or 4 tsp/Gal	1 ml/L or ¾ tsp/Gal			1-2 ml/L or ¾-1¼ tsp/Gal
Week 2 Vegetative	18 Hours	5 ml/L or 4 tsp/Gal	5 ml/L or 4 tsp/Gal					5 ml/L or 4 tsp/Gal	1 ml/L or ¾ tsp/Gal			1-2 ml/L or ¾-1¼ tsp/Gal
Week 3 Vegetative	18 Hours	5 ml/L or 4 tsp/Gal	5 ml/L or 4 tsp/Gal					5 ml/L or 4 tsp/Gal	1 ml/L or ¾ tsp/Gal			1-2 ml/L or ¾-1¼ tsp/Gal
Week 4 Flowering	12 Hours	5 ml/L or 4 tsp/Gal	5 ml/L or 4 tsp/Gal					5 ml/L or 4 tsp/Gal	1 ml/L or ¾ tsp/Gal	1-2 ml/L or ¾-1¼ tsp/Gal		1-2 ml/L or ¾-1¼ tsp/Gal
Week 5 Flowering	12 Hours			5 ml/L or 4 tsp/Gal	5 ml/L or 4 tsp/Gal	1 g/10 L or ⅓ oz/2½ Gal		5 ml/L or 4 tsp/Gal	1 ml/L or ¾ tsp/Gal			1-2 ml/L or ¾-1¼ tsp/Gal
Week 6 Flowering	12 Hours			5 ml/L or 4 tsp/Gal	5 ml/L or 4 tsp/Gal			5 ml/L or 4 tsp/Gal	1 ml/L or ¾ tsp/Gal	1-2 ml/L or ¾-1¼ tsp/Gal		1-2 ml/L or ¾-1¼ tsp/Gal
Week 7 Flowering	12 Hours			5 ml/L or 4 tsp/Gal	5 ml/L or 4 tsp/Gal			5 ml/L or 4 tsp/Gal	1 ml/L or ¾ tsp/Gal	OR	2-5 ml/L or 1¾-4 tsp/Gal	1-2 ml/L or ¾-1¼ tsp/Gal
Week 8 Flowering	12 Hours			5 ml/L or 4 tsp/Gal	5 ml/L or 4 tsp/Gal			5 ml/L or 4 tsp/Gal	1 ml/L or ¾ tsp/Gal		2-5 ml/L or 1¾-4 tsp/Gal	1-2 ml/L or ¾-1¼ tsp/Gal
Week 9 Flowering	12 Hours			5 ml/L or 4 tsp/Gal	5 ml/L or 4 tsp/Gal			5 ml/L or 4 tsp/Gal	1 ml/L or ¾ tsp/Gal	1-2 ml/L or ¾-1¼ tsp/Gal	2-5 ml/L or 1¾-4 tsp/Gal	1-2 ml/L or ¾-1¼ tsp/Gal
Week 10 Flowering	12 Hours											

TIPS

- Apply Ultra Jive once a week during the grow cycle and twice a week during the flowering cycle. For Hydroponics use 1 ml during the active growth stage and 2 ml during the bloom stage.
- Rain Gold: for hydroponic use increase dosage to 2ml/L or 1 ½ tsp/Gal
- In hydroponics pH balance water after nutrient is added Grow: pH 5.8 - 6.0 / Bloom: pH 5.4 - 5.8
- Please note: Big Blossom is measured/10L/2½ Gal.
- * During week 4 (or just before desired height is achieved) introduce MEGABUD into your feeding schedule to regulate the height of your plants and encourage multiple bud sites. Use it again in week 6 to act as a finisher, **OR** in week 9 to harden flowers.

All measurements are based on water with a ppm of 0. This feeding schedule is produced by the manufacturer and is only a guideline. Individual results may vary and are not guaranteed. Not all plants will react the same to every product. It is important that you experiment with different products and dosages to come up with a feeding schedule that meets your needs to produce plants with maximum yield.
